

EMERGENCY ALERT SYSTEM (SCHOOL MESSENGER)

The Bethlehem Township School District uses the SchoolMessenger messaging system to provide voice, text, and email alerts to parents. These alerts include school closings/delays, important events, and emergency notifications. Parent phone numbers are captured as part of the registration process and are automatically added to the alert system. Should your phone contact information change, please update it by contacting your child's school office.

SchoolMessenger requires families to opt-in to receive SMS text alerts.

- If you are new to the district, your registration will automatically generate an opt-in text once your information has been added to the system.
- All others should text Y to 67587 to opt-in.
